

Upcoming: 25th ESV Conference

NHTSA Associate Administrator Nathaniel Beuse Moderates VIP Panel on Automated Vehicles

The promise of automated vehicles includes saved lives, improved mobility, and increased efficiency in transportation, but it also comes with many technical, policy, and social challenges. This session will feature a panel of academics and researchers from leading universities and Federal agencies who will discuss a variety of issues related to the current technical trends and barriers for automated vehicle development, the human factors challenges of automated vehicles, lessons learned from aviation, and how the research community as a whole can work alongside industry to ensure the promise of automation comes to fruition on our roadways.

Nathaniel Beuse
Associate Administrator,
Vehicle Safety Research,
NHTSA

Sheryl Chappell, Ph.D.
Scientific and Technical
Advisor for Human
Factors, Federal Aviation
Administration

Philip Koopman, Ph.D.
Associate Professor of
Electrical and
Computer Engineering,
Carnegie Mellon
University

Venkat N. Krovi, Ph.D.
Michelin Endowed
SmartState Chair
Professor of Vehicle
Automation, Clemson
University —
International Center for
Automotive Research

James Sayer, Ph.D.
Director, University of
Michigan Transportation
Research Institute, and
Adjunct Professor,
Department of Civil and
Environmental
Engineering, University
of Michigan

25th ESV 2017

25th International Technical Conference on
the Enhanced Safety of Vehicles (ESV)
